

# **BENCHMARK**

## **CIVIL CONTRACTING LTD**

Benchmark Civil Contracting Ltd. has been operating in all types of medium to large infrastructure projects in the Oil & Gas industry as well as multiple municipalities infrastructure upgrades.

Being in such a proactive and safety conscious industry we always look for new safety and environmental products to allow Benchmark to continue to stand out as an industry leader. We have found that the newest innovative and revolutionary products from National Safety Solutions (NSS) has allowed us to provide the highest level of safety and environmental protection within our company. The products and support that we have received from NSS is second to none. Observing the positive changes these products have made in our company, we approached NSS to allow Benchmark Civil Contracting to become a Distributor as we wish to promote and provide other companies in all industries the opportunity to use these products to strengthen their safety culture as it did ours. We feel that when everybody works together, looking after the environment and the safety of our employees can only make a much safer industry. With this proactive approach, we at Benchmark have undoubtedly enhanced our overall safety culture and performance as a first-class contractor. We highly recommend the complete line of Start Right Safety Products that NSS has to offer.
