

To: National Safety Solutions
Attn: Grant Toutant

Good Morning Grant.

I'm pleased to provide the following testimonial for your use;

We have been using NSSL for the better part of a year as a key component of our fleet/asset management program and supplementing our overall corporate safety program. We have the system installed on our fleet of company trucks as well as our heavy equipment. The system greatly helps us manage our equipment start-up procedures to ensure employee compliance. I believe this helps us to drive and maintain a culture of safety first and in the maintenance and management of our fleet of vehicles. Grant and his team are knowledgeable and passionate about their product and its application to a culture of safety and transparency in industry. I look forward to our continued partnership and would recommend their solution to anyone that wants to take the safety and reliability of their workforce and fleet to the next level.

Sincerely,

*Josh Melanson
President*
